GENERATOR

Vol 3, No. 2, February 2019

During this **MONTH** OF , love your generator!

While it would be ideal for you to carry a small stock of the spare parts, maintaining an adequate supply of diesel fuel and essential lubricants and ensuring that your generators is run relatively frequently this does become a nuisance. Besides, why worry yourself with somewhat technical details when **PacB Electech** has reliable and keen expert technicians who travel most of the day to assist in whichever area your generator may be installed. Opting to appoint us to assist with the maintenance of your generator results in us assuming responsibility for all servicing and repairs as defined by the terms and conditions of the contract, giving you absolute peace of mind!

Contact **PacB** ELECTECH to schedule your generator's next service today!

//079 516 6269 //estelle@pacb.co.za

2019 PRICES

New year...new prices! Please contact us as soon as possible to revise existing quotes or to provide new quotes because some prices have changed substantially.

We look forward to receiving your requests!
