News

Hello
WINTER

GENERATOR

Vol 4 No. 5 June 2020

OPEN FOR BUSINESS

We are very pleased to confirm that, as of Monday 1 June 2020, we are fully operational again. The entire production team will return to work and we are looking forward to completing the orders currently on the books and of course getting in all the new orders we possibly can!

Due to the fact that we have to adhere to physical distancing regulations we are limiting the Factory Acceptance Tests to the minimum. Should you wish to conduct a FAT, feel free to contact Marlene or Freddie JNR. (depending on who you placed your order with) and they will make the necessary arrangements for your **Virtual FAT**.

KEEP A SAFE DISTANCE

WELCOME to the FUTURE

We are keeping a close eye on the exchange rates and are happy to confirm that we are currently busy working on the latest price lists. Please keep the lines of communication with the sales team open to ensure that you are aware of the latest pricing for whichever project you are busy working on at the moment.

STAY SAFE
STAY HEALTHY

GENERATOR

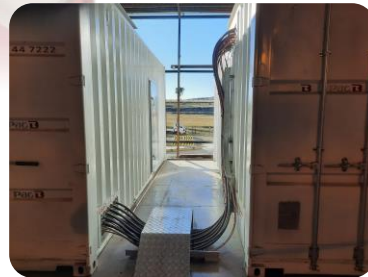

Vol 4 No. 5 June 2020

During Level Four the PacB Group proudly completed the manufacturing of 2 x 1250kVA Perkins units for an animal feed factory in Vrede, Free State, with a rather intricate installation on Electech's side.

One Of Our *Proudest* Moments

#lockdown2020

#PacBpride

We are very proud of the whole team who worked around the clock to make this project a success!
